Understanding Your Report

SEIR Model:

- Susceptible: Healthy individuals who can catch the virus.
- Exposed: Infected but not yet contagious (incubation).
- Infectious: Actively spreading the virus to neighbors.
- Recovered: Generated immunity after infection.

R-Value (R_t):

- $R_t > 1.0$: Outbreak is growing exponentially.
- $R_t < 1.0$: Outbreak is under control/decaying.
- Target: Keep R_t below 1.0 via lockdown or vaccination.
